

"We've established Tempini with the purpose of exploiting and exporting the aesthetic culture we've been cherishing for more than 100 years. Through our experience and tradition, we've managed to make Romania a European country of design, focusing on state-of-theart materials and the quality we're providing. Designing today, for the generation of tomorrow."

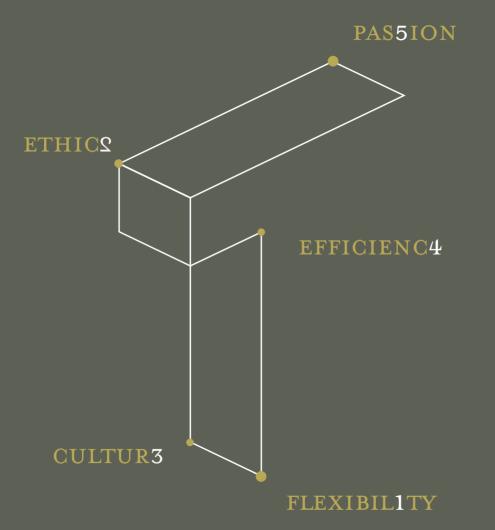

Gigi Nacev

Chief Executive Officer

Tempini because...

The vision which has brought Tempini this far is sustained by our virtues, principles which help us build stronger business partnerships with our clients and companies. These are the five pillars which stand for the Tempini brand values - FLEXIBILITY / ETHICS / CULTURE / EFFICIENCY / PASSION

ur brand started small. In 1921, a company named Bonometti Ada Tempini was founded in Northern Italy, in times when technology sounded rather like fiction. Selling ceramic tiles was somewhat challenging in an era where everything was the result of manual labour, from design to shipping. But once it made its breakthrough in the construction industry, Bonometti was regarded as a reliable supplier of ceramics, sanitary ware and bathroom furniture.

> But this had only been the beginning in a book about passion, innovation and character that was building up.

ears later, in 1968, brothers Angelo and Enrico Tempini take over the company's management. Amidst social, economic and technological transition, Tempini needed to evolve quickly. Two years later, this motivation became a purpose and the business started specializing entirely on ceramic products. Their vision became their business model.

> <u>"We managed to prove</u> <u>that the only way to do</u> <u>extraordinary things is to</u> <u>do it passionately."</u>

his creed which proved to be of important value was taken even further throughout the years, materializing through various projects of international architectural significance. Creating innovative products, bold designs and building strong relationships with partners and customers has driven Tempini at the top of this industry.

The company has made obvious progress, as did technology and design, but one thing remained the same: the passion. Tempini was founded in order to share its century-old experience all over the world in an ascent of entrepreneurship.

he opening of Tempini's Romanian Premises, in Timisoara

The year of 2009 comes with the expansion of our brand in Timisoara, introducing a conceptual showroom, the largest in Eastern Europe. 5 years later, Timisoara becomes hereby an important center of interior design. 2009 also marks the starting point of Tempini Social, an influential, professional network which manages to propel Tempini upwards on a scale of excellence.

We are defined by our passion for creativity, aesthetic and art.

Grand opening of Tempini Concept Store Bucharest

2015 is an important year for Tempini Romania, as the opening of the most exclusive showroom takes place in Bucharest. Tempini Concept Store Bucharest is a museum of art and design, where beauty is redefined through aesthetic perfection and authenticity. This event comes with an important step in the history of the company, as it is taken over by its successors.

Thus, we speak of an important heritage, a small business being transformed into a striking success and managing to carry on important family values which make up for the company's reputation, established 96 years ago:

ethics | culture | flexibility | passion

Statement Projects

<u>1990</u> Torre Arcobaleno Milano

Premium Partener

The Rainbow Tower in Milan means a lot in the city's urban landscape. Milan was already a capital of fashion and design, so that a reinterpretation of the tower had to rise up to the expectations. The old water tower went through 3 stages of development and had been on the verge of demolition, 10 years before its destination as a building was changed and the decision of restoration was taken. Torre Arcobaleno became the Rainbow Tower after its restoration in 2015, thanks to the event EXPO Milano which provided the perfect occasion therefore. Tempini is happy to be part of this project.

<u>2014</u>

Bosco Verticale Milano

Premium Partener

This project is a groundbreaking attempt of innovative architecture to create the first Vertical Forest in the world. Tempini was one of the main providers of both exterior and interior materials. The two buildings in Milan (Porta Nuova) were designed by Stefano Boeri Architetti, the construction stage proving to be a great logistical challenge for that time. It took some of the brightest minds in the industry to provide a solution to climate conditions and vegetation, given the height of both blocks, measuring a staggering 364 feet. But the project's well-deserved recognition came shortly after: in 2018, Bosco Verticale was awarded with RIBA for International Excellence, showing visionary engineering and architectural supremacy.

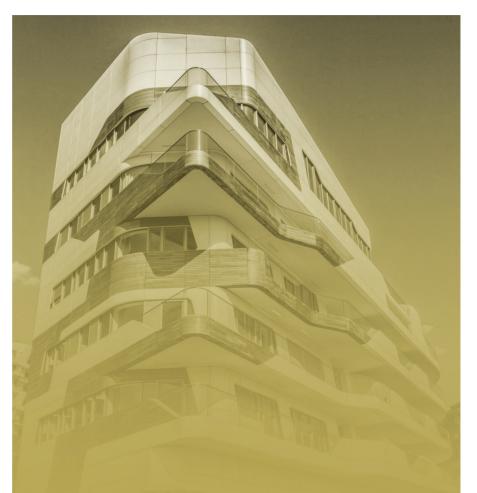

2014

City Life Milano

Premium Partener

A mix of modern architecture is shown in this ensemble, City Life Milan is designed by famous architects Arata Isozaki (The Isozaki Tower, measuring 721 feet), Zaha Hadid (The Hadid Tower, measuring 557 feet) and Daniel Libeskind (The Libeskind Tower, measuring 492 feet). The buildings stand out through state-of-the-art technology and materials. Tempini provided the necessary ceramic materials which became part of this huge achievement.
